

JOB TITLES AND DESCRIPTIONS

Transwestern Pipeline Company, LLC

Pursuant to § 358.7(f) a transmission provider must post on its Internet Web site the job titles and job descriptions of its transmission function employees.

Commercial

Sr. Vice President, Commercial & Regulatory Affairs – Responsible for the overall planning and management of all marketing, commercial functions, and regulatory affairs, including business development and market expansions, execution of natural gas transportation service agreements, and all FERC matters. Also responsible for the Gas Control, Customer Services, and Facility Planning functions.

Sr. Director, Marketing and Business Development – Directs the marketing and business development efforts of the Pipeline Commercial Group in the implementation of long-term business planning, development and deal origination.

Manager, Business Development - Acts as liaison between departments to develop and implement Pipeline marketing strategies and new service development efforts. Participates in the identification and analysis of business opportunities in Pipeline's targeted supply and market areas.

Vice President, Market Operations – Manages Pipeline's linepack/gas inventory, including daily imbalances and operational gas sales. Coordinates the availability and pricing of pipeline capacity with Marketing and Business Development.

Director, Marketing - Responsible for management and direction of daily pricing of pipeline capacity.

Marketing Representative(s) - Participates in the identification, analysis and negotiation of marketing and business development opportunities in Pipeline's targeted supply and market areas.

Vice President, Gas Control & Optimization – Responsible for the overall direction of the Gas Control Team, including planning, directing and coordinating staff in the management and control of gas through the Pipeline system.

Manager(s), Gas Control– Responsible for providing supervision to Gas Control Team in the scheduling of transportation services and the resolution of scheduling/operational problems.

Engineer(s) – Responsible for approval of firm transportation capacity requests. Conducts pipeline facility evaluations to provide technical support for project planning, evaluation and development phases of new transportation/Marketing projects, ongoing pipeline system planning and analysis and operations support, resolution of operational problems, evaluation of project alternatives to enhance business opportunities and determine economic feasibility, and development and maintenance of pipeline models to support throughput activities.

Gas Controller(s) – Responsible for monitoring and controlling the flow of gas through the Pipeline system. Coordinates the use of facilities consistent with system capabilities, operating characteristics and conditions, in accordance with contractual and regulatory requirements.

Director, Contracts – Responsible for oversight and administration of gas transportation agreements, electronic communications and capacity release.

Director Commercial Support – Responsible for managing support services to customers, including gas transportation, operator confirmation/balancing, customer communication, winter preparedness, and customer service issue resolution.

Supervisor of Market Services – Responsible for managing support services to customers, including gas transportation nominations/scheduling, operator confirmation/balancing, customer communication, and customer service issue resolution.

Contract Administration Representative(s) – Responsible for processing contract requests and related customer inquiries, and the administration of contracts and records in compliance with legal, contractual, and regulatory requirements. Responsible for oversight and administration of Informational Postings, maintenance of the legal entity and POI systems and for system security. Recommends and participates in the implementation of system enhancements to meet customer, company and regulatory requirements.

Electronic Commerce Coordinator(s) – Responsible for administration of the Capacity Release program and for coordinating the EDI function. Responsible for acting as project leader to implement new electronic business requirements. Prepares electronic communications and provides business process training. Defines and documents business requirements, such as for NAESB standards, tariff compliance, and new services, for computer systems.

Customer Service Representative(s) – Responsible for acting as a primary contact to assigned customers to initiate and coordinate natural gas transportation nomination and scheduling activities, preparation of invoices and monitoring of collections, and general customer support to resolve customer problems regarding transportation activities.

Operations

Vice President, Operations – Responsible for the day to day operations of the pipeline system including compressors, auxiliary equipment and control systems. Responsible for maintenance scheduling, reliability program and fuel use evaluation and prime mover performance. Works closely with gas control to insure optimal use of facilities to meet system demands.

Director, Operations – Responsible for directing, planning and controlling the continuous and safe operation, maintenance and improvement of the field operations.

Manager, Reliability – Responsible for the physical asset management of the companies' engine, compressor and auxiliary equipment maintenance and reliability programs.

Operations Manager – Responsible for managing field operations personnel to accomplish the continuous and safe operation, maintenance and improvement of the field operations.

Manager Operations – Responsible for managing field operations personnel to accomplish the continuous and safe operation, maintenance and improvement of the field operations.

Manager, Construction – Responsible for managing construction projects of the company pipelines.

Vice President, Technical Services – Responsible for directing the technical services department in all technical areas of pipeline operations including pipeline integrity, compression, material quality assurance/control, metallurgy and welding, GIS and engineering records.

Vice President Underground Storage- Responsible for all underground storage facility operations.

Director, Technical Services- Responsible for directing technical aspects of pipeline integrity operations.

Asset Management and Reliability Director- Responsible for the physical asset management of the companies' engine, compressor and auxiliary equipment maintenance and reliability programs.

Pipeline Integrity Director- Responsible for directing and planning the safe day-to-day regulatory compliance.

Manager Pipeline Services- Responsible for managing and planning the corrosion services activities.
