
Transwestern Pipeline Company, LLC

Three choices for confirming at a location are offered: (1) Active Confirmation, (2) Passive Confirmation, and (3) Confirmation by Exception

Active Confirmation	The operator or designee for a location actively confirms all nominations at all locations during all Cycles . If the operator does not confirm in the Timely cycle, the confirmed quantity defaults to the previous day's Timely scheduled quantity. If the operator does not confirm in any of the Intraday Cycles, the system will default to the confirmed quantity from the previous Cycle.
Passive Confirmation	The operator or designee for a location actively confirms nominations at all locations in the Timely Cycle . The Operator will not be required to confirm during the Intraday Cycles. The confirmation quantity from the previous Cycle will be copied to the next Cycle. If the operator does not confirm in the Timely cycle, the confirmed quantity defaults to the previous day's Timely scheduled quantity.
Confirmation by Exception	Transwestern will automatically confirm ALL NOMINATIONS for the operator's or the designee's specified location(s). All confirmed quantities will equal nominated quantities for all cycles. Operator will be able to change any confirmation that is automatically confirmed by Transwestern during any cycle. Any manual change made by the operator will remain in place for the entire gas day.

I _____ (operator or designee) request the confirmation options that I have specified in the table below. (Only locations listed in the table below will be changed.)

I understand that if I make no selection, the Operator Confirmation Choice option will default to **Active Confirmation**.
